

Press Release

Service Point Acquires Open Archive Systems; Reinforces Support of Electronic Document Management Initiatives

Woburn, MA (5/19/06) – Service Point announces it has acquired software developer Open Archive Systems, based in Windham, New Hampshire. Open Archive Systems, established in 1994, is a software developer and solutions integrator for both office and engineering environments. As a specialist in imaging solutions, Open Archive represents best of breed products including its eChive Series and REnew Series. Solutions include document management and publishing, electronic archiving, enterprise viewers, raster editing, conversion to CAD and imaging tools to edit, split, merge, repair and rename common image and barcode files.

The acquisition will support Service Point in further developing its electronic document management services to meet the needs of its clients. There will be immediate opportunities for clients as well through the marriage of complementary, existing systems from Service Point and Open Archive that together will provide enhanced benefits.

“We are very excited to announce that Open Archive will be joining forces with Service Point. Open Archive has a strong track record meeting the needs of their customer base with outstanding solutions which will dovetail perfectly with our approach,” said Steve Payne, Service Point Managing Director and Chief Financial Officer.

Bill Sullivan, Service Point Managing Director and Chief Operating Officer, adds, “Open Archive augments our level of expertise with document management systems and will play a significant role in our development efforts.”

President of Open Archive Systems, David J. Wilson, states, “Services are a vital part of today’s document management industry and we are excited about the broader opportunities that will develop from merging our software offerings with Service Point’s larger market presence. We are looking forward to working together and delivering a more comprehensive solution to our combined customers.”

Service Point (www.servicepointusa.com) assists with the document management needs of A/E/C (Architecture, Engineering, Construction) and related professionals with services that span the complete life cycle of building projects, from concept to completion, through post-construction document archiving and retrieval.

The company provides document management technologies and reprographic services through over 400 On-Site Services (FM) programs with partnered A/E/C firms throughout the United States, through 16 networked service centers in major cities, and via online services.

Service Point USA is a subsidiary of Service Point Solutions (www.servicepoint.net), which employs more than 1,100 people in 4 countries with an international network of over 70 service centers, and more than 450 On-Site Services and Facility Management programs. Based in Barcelona, Spain, SPS is quoted on the Spanish Stock Exchange.
